DETAILED ACTION

Claims

Original claims 1-22 and new claims 36-38 are pending.

Original claims 23-35 have been cancelled.

Election/Restrictions

Applicant's election of the species directed to claims **1, 8, 9 and 36-38** (2; Figures 9-12) in the reply filed on **03/16/2005** is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election **without traverse** (MPEP § 818.03(a)).

While applicant's remarks state that "claim 1 is generic to species (1), (2), (3) and (4)", claim 1 is not generic to all of the originally claimed species (1), (2), (3), (4), (5), (6), (7) and (8) listed by the examiner in the office action mailed on 11-16-2004. Claim 1 is therefore not generic to all of the claimed species.

Claims **2-7** and **10-22** are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected specie, there being no allowable generic or linking claim. Election was made **without traverse** in the reply filed on **03/16/2005**.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

Claims 1, 8, 9 and 36-38 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: Although a “fitment” is defined as being removably attached to the burner control cover, claim 1 is vague and indefinite since it is unclear what structure would necessarily make up the “fitment”, applicant having assigned no meaningful structural detail to the “fitment”.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 8, 9, 36-38: Rejected under 35 U.S.C. 102(e)

Claims 1, 8, 9 and 36-38 are rejected under 35 U.S.C. 102(e) as being unpatentable over US006585510B2 (PAPAI).

- a holder (10) with a top rim;
- a burn control cover (40) with a fitment (60) on a top surface and with a central exhaust hole (35) formed therein;
- a rim (23) configured to removably attach to the top rim (not referenced) of the holder and a lower ring (26) extending vertically down from an interior of the burner control cover and which extends below (see figure 1) the top rim of the holder when the burner control cover is attached to the holder;
- the burner control cover includes peaks (29) and troughs (23) that define air intake vents in the rim; and
- wherein the burner control cover and holder are configured to vent air into the holder at a circumference of the rim of the holder.

Conclusion

See the attached USPTO form 892 for prior art made of record and not relied upon which is considered pertinent to applicant's disclosure.
